ABSTRACT

This report describes the beginning, development, and implementation of Atlanta's four-quarter school year program. Under the plan, students attend any three of the four quarters offered each year, or they may enroll in all four quarters to take remedial or enrichment courses or to graduate early. The report indicates that during the first summer quarter of operation, approximately 39 percent of Atlanta's high school students enrolled in one or more courses. Main sections provide background information on (1) Atlanta and the needs of Atlanta students, (2) educational planning in Atlanta, (3) the development of the quarter plan and the process of informing the community, and (4) implementation of the plan. One section offers answers to frequently asked questions about the plan. Nine appendixes comprise guides for two courses, one in mathematics and the other in English; flow charts for science and mathematics; procedures for revising course offerings; a complete list of English courses; a conversion table for changing Carnegie units into quarter hours; requirements for high school graduation; the calendar for school years 1968-69 and 1969-70; courses offered in two different high schools; and some special learning opportunities available under the quarter plan. ACKNOWLEDGEMENTS

This report was developed in response to a large number of requests for a description of the four-quarter school plan of Atlanta. Obviously, the report would not have been possible had not thousands of individuals participated in developing and implementing the program. To them a note of appreciation is expressed. In the preparation of this report, grateful appreciation is expressed specifically to Miss Edith Miller for her assistance in organizing and editing and to Miss Marie Jamhoor for her untiring efforts and invaluable assistance in typing, organizing, and providing other related services during the entire preparation.

FOREWORD

At the time of this writing, the Atlanta School System is in its second year of a four-quarter school program. Preceded by two years of intensive planning and preparation and much time and study, the four-quarter school year is an attempt to provide continuous and relevant educational opportunities to Atlanta's citizens.

The purpose of this report is to present Atlanta's four-quarter program—its beginning, its development, and its implementation. The major thrust of Atlanta's four-quarter program is that it not only made possible the offering of continuous educational possibilities, it also served as a vehicle for a complete curriculum revision in secondary school.

No claim is made to have developed a perfect system or even to have developed one without problems, but a claim is made to have been concerned about contemporary youth, their needs, and an educational program designed specifically

for them. Whether at some future date the program is acclaimed to have been successful or not will depend upon many obvious factors, but perhaps the most crucial ones are to break traditions successfully and to change the image of what a school is suppose to be like.

Whether this program is applicable to any other system is not for us to say, but other systems may adopt any portion of the Atlanta program which is deemed desirable. It is strongly recommended, however, that any program accepted be tailor-made to fit the given situation.

PERSPECTIVE

The beginning of this story is the purpose behind the move to the four-quarter school year—that of providing educational opportunities relevant to the needs of Atlanta's population.

ATLANTA—A CHANGING, GROWING METROPOLIS

The realization of need to reexamine the purposes of the high school started to come into focus in 1952 when the city enlarged its boundaries from forty-six square miles to one hundred twenty-eight square miles, thus changing the total population from 331,314 to 430,641, and the school population from 66,466 to 83,687. Until this time, the school population had been reasonably stable. Accompanying this growth was the beginning of major socioeconomic change not only in Atlanta but in the entire nation. With the advent of the Civil Rights movement in 1954, followed by the various overt actions calling attention to the necessity for equal treatment of blacks, certain shifts in population distribution began.

educators. With this rapidly changing school condition came a reduced academic achievement rate, an increased awareness of the inability to communicate effectively between teacher and pupils, and a continuous challenge to the long established and somewhat hallowed requirements and expectations of high school pupils—both collegebound and otherwise.

Other social forces helped to accentuate the problem—

- the federally sponsored programs designed to assist the low socioeconomic population
- the development of articulate cadres in disadvantaged neighborhoods
- the concentration of low rent housing in minimum geographical space
- the expression of discontent by violence
- the increasingly large number of urban males who were underemployed and/or unemployed
- the artificially engendered work experiences and work programs
- an increased mobility of pupils both between schools within the city and between school systems

Atlanta, one of the largest cities in the southeast, is known as a liberal city. Increasingly larger numbers of low socioeconomic citizens from other parts of the state and region streamed into the city in hopes of finding an improved way of life. Their children, when enrolled in school, brought problems not previously encountered by many of the Atlanta

Not only was the population undergoing great changes, the accumulation of knowledge very evident since the end of the second world war was beginning to have its impact. The long established courses of study were being seriously challenged. Reports from various studies and employment

agencies indicated that pupils enrolled in or graduated from high schools were performing at a level lower than required for minimum employment which indicated very clearly that a pupil in his tenth year of school was not benefited by remaining in an advanced course in Shakespeare when he couldn't read the Dick and Jane series. To continue to fail did not move the pupil closer to becoming a responsible and self-supporting member of a democratic society.

The other school systems in the Atlanta metropolitan area also were facing the same problem and—through a loosely structured organization—decided to pool their efforts and plan an improved high school program. Much study and exploration of organizational plans and structures which would permit an increased degree of flexibility in the instructional program and would accommodate highly mobile pupils led to the selection of the four-quarter year as a potential answer.

1840 school extended throughout the year. Modifications of this arrangement varied regionally according to the dictates of an agrarian economy. As this economy gave way to other types of employment, school calendars were changed, with the city schools adding vacation periods and the rural schools adding more instructional time. Shortly after the second world war, the nine-month school year was almost universally accepted. Even at this time, however, some districts recognized the need for an extended school year and began to look critically at a number of ways to revise and extend the school calendar.

The major concern of most of the sophisticated attempts to institute the extended school year, however, was economic. It was argued that it was bad business to invest in school buildings and personnel and to leave them idle for three months a year while there were such terrific overcrowded conditions in the school system. In certain locations, the public showed considerable interest in organizational plans which would provide more economical use of school buildings and saving of tax dollars.

THE FOUR-QUARTER SCHOOL YEAR

Organizing the school term into quarters or in some other variation so that educational opportunities are provided throughout the calendar year is not a new idea. In rural sections of the country, school schedules were originally planned to release children to perform work in the late spring, summer, and fall, but in many large cities prior to

on this basis alone met with little success. Reports of these

attempts reveal that the majority of the programs were abandoned for three very definite reasons:

1. **They did not achieve the economy they promised or were expected to achieve.** (Quite the reverse, actually. An extended school year program of necessity must be more expensive at the outset. Most of the programs were given very short trial periods so that no substantial savings were ever realized.)
2. There was a general lack of public understanding. Many people felt that the extended school year programs were designed to keep their children in school all year with no regard for the child's preference or the family's other plans for that matter. In most of the experiments where overcrowded conditions were at the base of the plans, pupils were assigned terms of attendance with no option. This, of course, led to bad public feeling and generated negative public reaction.

3. The third cause for failure of the previously attempted extended school year programs was the lack of support from the educational community. Not only was the public left wanting information and involvement in the plans and progress of the extended school year attempts; very often, the educational community was also ignored and left uninformed.

ATLANTA'S PURPOSES

In the late 1950's Atlanta, too, had given consideration to instituting a year-round program for the primary reason of saving building space, but after careful investigation had decided against it. In contrast to earlier needs, the reason for examining the four-quarter school year in 1967 was based upon a different set of circumstances or needs. The major need was to determine the feasibility of organizing the high school calendar so that year-round educational opportunities could be provided and a more flexible schedule and viable program realized.

Furthermore, the public was almost totally in the dark about the program—its objectives, its expected outcomes. Rather, it was very often sold—when the public received any information at all—as the answer to all the problems of the educational system.

The need for a more relevant and up-to-date curriculum was evident. More than nine years had passed since completion of the last major curriculum revision. In the meantime, major changes had occurred in social conditions, the student body, and in the teaching staff. There was a need for the curriculum to be examined carefully and redesigned

so that it would provide for each child educational opportunities which would be difficult enough to be challenging but appropriately adjusted to him so that he could experience considerable success without becoming either bored or discouraged.

Another factor which had to be considered was that for the past number of years, approximately twenty-five percent (25%) of the high school pupils had participated in a regular summer school program for which they paid a tuition. Of this number, approximately seventy-five percent (75%) enrolled in advanced, accelerated, or enrichment work. Summer school attendance had long since ceased to be a place for failures or for making up work.

Pupils could also take advantage of job opportunities which were not always available during the summer months. A potential employer who needed an employee year-round such as a stock clerk could employ four different high school pupils, each in turn working his respective quarter. Also, the teaching staff could have greater flexibility in scheduling vacations, inservice, college study, or the part of the year they would teach.

To the professional staff in Atlanta, these reasons seemed to be somewhat different from those expressed in the past by school systems which had attempted a year-round program.

II A PLAN EMERGES

Two years were spent in planning the curriculum and organizational structure before any attempt was made to implement the four-quarter program. While full recognition is given to the important contribution of other systems in the Atlanta metropolitan area and to other systems which have tried similar programs in the past, this report focuses on the efforts and results of the Atlanta School System.

PLANNING FOR THE METROPOLITAN AREA

The eight school systems serving the metropolitan Atlanta area enroll approximately 300,000 pupils, including both elementary and high school—roughly one-third of all pupils in the public schools in the state of Georgia.

By joining together, representatives from these eight systems realized a certain amount of security while planning for the new high school curriculum. There was comfort in size and from knowing that each system did not have to attack this large task alone. Another reason for working together was to increase the ease of pupil mobility from one system to the other since the majority of the pupil movement was confined to the metropolitan area.

An overall steering committee was formed to provide an arena for discussing common problems and formulating recommendations affecting all of the cooperating systems. This committee was composed of members appointed by the

respective school superintendents and State Department of Education representatives. Acceptance of and consequent action based upon these recommendations was the prerogative of the individual school system. No attempt was made to form a super board of education with authority over the cooperating members.

The structure for cooperative action was composed of five major committee classifications:

The Steering Committee—members from each of the eight metropolitan school systems who were appointed by the respective superintendents. The functions of this committee were to provide overall planning, schedule activities, receive reports, pose problems and questions, and report to local systems and the State Department of Education.

The Intersystem Curriculum Committee—one member from each of the twelve intersystem subject area committees. The main function was to provide overall assistance in the development of curriculum areas and in the blending of respective subject areas into a total curriculum guide. This committee worked under the direct supervision of the Steering Committee.

The Intersystem Subject Area Committee—one

member from each school system's subject area committee. Members of this group provided basic communication between local system subject area committee and the intersystem curriculum committee.

The Local System's Subject Area Committee—one representative from each local school's subject area committee. In addition to providing the major input concerning the development of course content and teacher curriculum guides, this committee provided basic communication between the intersystem subject area committee and the local school subject area committee. In some school systems, selected representatives from each subject area committee formed an overall curriculum committee for that local system.

The Local School's Subject Area Committee—the department chairmen and the respective staff. Its members facilitated communication both within the department and among other local school subject area committees. The primary function was to help answer the questions: (1) What should a pupil learn in a given subject area while in school? and (2) Which of these concepts could best be grouped together to formulate one quarter's work for a given group of pupils with definable characteristics?

STEERING COMMITTEE

Intersystem Subject Area Committee

Local System's Subject Area Committee

Local School's Subject Area Committee

Even with this structure for communications and sharing of work among the systems, the development of the curriculum was accepted as the responsibility of the respective school systems.*

PLANNING FOR ATLANTA

With appropriate adaptations, the Atlanta School System followed the procedure outlined by the metropolitan group in organizing its task forces for the development of the new curriculum for the four-quarter plan. The overall steering committee for the system was composed of all high school principals, area superintendents, the assistant superintendent for instruction, and some members of his staff.

Input from all special interest groups concerning the nature of the new curriculum was considered. The ideas were merged into overall working guides for the committees.

Committee Guides

When work is completed, course offerings and content should be adequate to provide continuous progress for any pupil enrolled. This means that all major concepts within any subject area which a pupil might learn should be identified and listed. They should then be grouped in logical groupings to form a course. The number and difficulties of concepts selected for any given course should be in keeping with the characteristics of the pupils for whom the course is designed. This should be done without regard to available instructional materials, organization and structure of textbooks, previous methods of grouping of pupils, or any other predetermined limitations. In developing each course, the feasible behavioral objectives; the characteristics of the pupils for whom the course is designed; the administrative requirements, such as double periods, time of day, etc.; and a general catalogue description of the course must be provided. *Bibliographies, instructions for teachers, and other appropriately related materials must be developed also.*

Courses must be developed as autonomous, non-sequential units whenever possible so they can be scheduled without regard as to what is appropriate for a beginning eleventh grader. If this system is effective, the school will be completely ungraded.

The steering committee's assignment was to consolidate the curriculum committee reports and to recommend the necessary changes in policy and administrative regulations. This, too, was a major task for it left virtually no portion of the existing operating procedure unchanged.

III A PROGRAM IS FORMED

In order to accomplish the tasks outlined in the preceding pages, four subcommittees were formed to provide in-depth consideration of the problems in the areas of curriculum, guidance and orientation, administration, and personnel. (The sub-areas are identified on pages 12. through 13.) These committees worked periodically throughout the 1967-1968 school year and continuously for five weeks during the following summer.

CURRICULUM REVISION

Following the guides was difficult, and the committee members had to develop an entirely different approach to curriculum revision from the ones normally followed. Pupil characteristics had to be classified into numerous and varying groupings—chronologically, achievement, reading ability, mobility, and other ways that would provide a better understanding of the pupils' learning styles. These characteristics were then grouped into the more common classifications. As part of this process, the list of concepts in each subject area appropriate for a high school pupil to learn continued to grow. Grouping these concepts into courses resulted in identifying eight hundred sixty quarter courses. Another very important step was necessary in the development of the new course outline. Where feasible, behavioral objectives were written as part of the course outlines, and guides for the teachers were developed.

Even though consultative services were available to the committees, the abilities and accomplishments of the groups varied. The products seemed adequate for trial implementation in the Atlanta schools but were not adequate for mass distribution, because refinements and corrections were needed.* Since some of the teachers who were to implement the program helped in varying degrees to write the course content, it was not necessary to develop some of the materials as completely as they would have been for teachers who were not involved in their development.

Another important area which required considerable planning was designing non-sequential courses which would make possible greater flexibility. The new curriculum must provide opportunities for pupils to schedule during any quarter any of the many courses deemed desirable for him.* An examination of the science flow chart shows that a pupil might start with course number 111. He could follow this with courses 112, 113, and 114 taken in any order, then enroll in any of course numbers 211 through 214 and/or numbers 221 through 223. Another way a pupil might enroll in the above mentioned 200 series courses would be by completing course number 101. Following that, he could complete courses 102, 103, and 104 taken in any order, and then move into the 200 series courses. This sequence illustrates that no single science course (or any other specific course) is mandatory for any given pupil unless his future goals and objectives demand a certain body of content. By

*Samples of course guides in mathematics and English are included in pages 24 through 30

*Flow charts showing the non-sequential courses in science and mathematics are presented on pages 31 through 35

this same reasoning, repeating courses failed would be eliminated. If pupils were adequately placed in the beginning, there should be few failures anyway.

The flow chart of mathematics shows these same points but also illustrates that a pupil may move horizontally as well as vertically, if it is more in keeping with his learning style. Also, he might jump from any given point in one series to any given point in another series so long as he has developed adequately to succeed in the new assignment.

To implement this concept fully, enough courses had to be developed to enable any pupil at any given time to find an appropriate course designed to meet his specific needs. The rules to follow in designing new courses or deleting existing courses appear on page 36. The system of English eight-one, eight-two, nine-one, nine-two, etc., with a minimum number of electives was abandoned and replaced by greatly expanded course offerings. For example, fifty-seven different English courses were developed.* The following excerpt from a list of the English courses illustrates the numbering system.

| TITLE DESCRIPTION | |
|-------------------|--------|
| NUMBER | COURSE |

| | |
|-------------|--|
| 3 0 1 1 8 0 | Spelling |
| | Designed to improve basic spelling skills, some proficiency in the following areas is a desired outcome of the course: use of diacritical marks, syllabication, roots, prefixes, and suffixes. |

| | |
|-------------|---|
| 3 0 1 2 1 0 | Literary Themes |
| | A course to introduce the study of literature in high school, with emphasis on identifying and understanding literary themes. |

The first two digits in the course number represent the designation for English; the next three digits identify a specific course in the Atlanta School System; and the last digit is open and can be used for further identification, such as levels within a specific school.

*A complete list of these courses may be found on page 37-44

ADMINISTRATIVE REGULATIONS

Changes in practically every area of administrative regulations, rules, and directions were made imperative by the new course offerings. In scheduling, more attention had to be given to the individual pupil. His teacher in a given subject area, as well as the counselor and other school personnel, had to plan cooperatively with him to select which course or courses would be best suited for him. Since pupils could make a new schedule each quarter, master schedules had to be made quarterly. All pupil records had to be

changed to accommodate the new system, and the method of reporting to parents was modified. A decision was reached that all courses would carry the exact same credit, depending upon the time spent in class. The time spent in class was chosen as the criterion upon which to base credit; therefore, this would be true whether the subject was typing or advanced chemistry. If a pupil attended one hour a day, five days a week for one quarter, five quarter hours of credit would be earned. Conversion tables were developed to change Carnegie units into quarter hours and vice versa. A portion of the table follows.*

One (1) Carnegie unit equals fifteen (15) quarter hours. To convert eighth grade work to quarter hours:

- (1) Count academic and activity credit for the work you satisfactorily completed last year.
- (2) Use the following conversion table to find the number of quarter hours your academic and activity credits equal.

| ACADEMIC Unit Credit | Quarter Hours | ACTIVITY | |
|-------------------------|---------------|----------|---------------|
| | | Credit | Quarter Hours |
| 1/2 | 7-1/2 | 1/8 | 4 |
| 1 | 15 | 1/4 | 7-1/2 |
| 1-1/2 | 22-1/2 | 3/8 | 11 |
| 2 | 30 | 1/2 | 15 |
| 2-1/2 | 37-1/2 | 5/8 | 19 |
| 3 | 45 | 3/4 | 22-1/2 |
| 3-1/2 | 52-1/2 | 7/8 | 26 |
| 4 | 60 | 1 | 30 |

11.

*A conversion table for changing Carnegie units into quarter hours appears on page 45. Requirements for high school graduation were rewritten in terms of quarter hours and are shown on pages 46 and 47.

A school calendar for the new program was developed. Although it was originally thought that fifty-five (55) day quarters would be most desirable, state regulations prevented the realization of this goal during the first year; however, some modifications in the state requirements were allowed. (The calendars for 1968-69 and 1969-70 appear on page 48..)

Interim Regulation on Quarter Choice

The thesis that pupils and teachers should be allowed to choose their quarters of attendance is a firm part of the four quarter school year program. However, to ensure stability during the first year, an arbitrary rule was passed that in order for a pupil to exercise an option to remain out of school during any quarter other than the regular summer quarter, he must attend during the summer and earn credits beyond his normal placement. Teachers were required to teach the first three quarters and given the choice of teaching the fourth.

Administrative Tasks for Steering Committee

To ensure that the tasks identified for completion prior to beginning operations were completed, the steering committee divided into four subgroups and assumed responsibility for the work in the categories listed below.

1. Consolidate and print out recommended courses from subject committees.
2. Determine and recommend to the Board of Education requirements for graduation.
3. Develop a catalogue of courses for the school system.
4. Establish guidelines for equating quarter courses with present curricula offerings including equation of credit with quarter hours, etc.
5. Recommend guidelines for extracurricula activities.
6. Recommend policies and guidelines concerning athletics, work-study programs and other similar programs.

Guidance and Orientation

1. Establish registration or prescheduling procedures for this spring and next fall.
2. Develop policies and guidelines each school can use to effectively help students choose an appropriate course-of-study.
3. Suggest steps for implementing teacher, student, and parent orientation.
4. Identify and recommend in-service and orientation programs for teachers, administrators, and others

- as needed to implement the quarter system.
- 5. Study existing policies and recommend necessary changes, additions, etc.

Administrative

- 1. Decide on school calendar to correspond with other school systems.
- 2. Recommend procedure for effectively scheduling teachers, students, and space in terms of curriculum.
- 3. Check and determine textbook and supply needs.
- 4. Make guidelines for devising individual school budgets.
- 5. Recommend necessary changes, if any, in purchasing procedure.
- 6. Identify problems and issues regarding accreditation and make recommendations.
- 7. Revise report cards, permanent records, and other necessary forms.

Informing the Community

- Adequately informing the community was another task which had to be done thoroughly. Every media available was used—small group meetings, large group meetings, PTA, television, radio, newspapers, letters to parents, and any other way that seemed to be practical. Even with this effort, some individuals did not completely understand the program.

- 3. Recommend most effective means of staff utilization, recruitment, and assignment.
- 4. Recommend salary plan and policy changes.
- 5. Recommend necessary changes to pension policies, if needed.
- 6. Examine and recommend needed changes in sick leave, study leave, vacation leave, etc.

Personnel

- 1. Recommend necessary changes, deletions, and/or additions to personnel policies and contracts.
- 2. Determine the best way to staff each quarter course.

13.

Although the list seemed to have been comprehensive, additional tasks and problem areas were identified during the first year of implementation.

IV IMPLEMENTING THE PLAN

The program went into operation in the fall quarter of 1968 with few obvious changes in pupil scheduling patterns since most had preregistered during the spring quarter. Scheduling during the winter quarter did reflect some changes. The pupils realized that more flexibility was permissible and that the course selections had been greatly increased.

Courses for Schools

While theoretically any of the eight hundred sixty (860) courses listed in the catalogue could be taught during any quarter, a procedure had to be established for determining the courses to be selected for a given school. From information known about the needs of the pupils at a given school, courses which seemed appropriate were selected from the course catalogue, and from this list pupils, with guidance, selected courses they wanted. In most cases, the number of courses actually offered was less than the first listing since some courses were not chosen by enough pupils to warrant teaching them.

Since each school selected only the courses needed by the student body enrolled, there were wide differences in the courses selected among the schools. A complete listing of courses selected by two different schools is shown on pages 49. through 59. A quick comparison of these selections reflects the flexibility of the curriculum. One school selected

126 courses, while the other school selected 216. Pupils in the first school were from homes classified as affluent and most planned to go to college. The courses selected represent the traditional college preparatory program which is in keeping with the objectives of the pupils.

Pupils in the second school were from families with average income, and in the past approximately forty percent have enrolled in college. Courses selected for these pupils represent a much wider offering than the first school and include many vocational courses.

Courses for Pupils

By the third quarter, changes in pupil registrations were reflecting individual needs and desires. An example of this is shown on the following page for a pupil who is in a college preparatory program. During the first two quarters, there was little change in the courses selected. The pupil stated that by midway of the second quarter he was showing signs of fatigue, becoming nervous, and in general needed to lighten his load. To accommodate this need, history was dropped the third quarter and the pupil served as a teacher aide. At this time, the pupil decided to attend the fourth (summer) quarter and scheduled personal typing, two courses in English, and the history course originally planned for the third quarter. (For the fall quarter, 1969, eight periods were

PUPIL'S ACTUAL SCHEDULE

Fall Quarter—1968

- Homeroom
1. History (Nature of Civilizations)
2. French (Intermediate French A)
3. P. E. (Introduction, Racket & Target Sports)
4. Science (Chemistry of Solutions)
Lunch
5. English (Adventuring Literature I)
6. Math (Intermediate Algebra A)

Winter Quarter—1968

- Homeroom
1. History (Development of Nation-State)
2. French (Intermediate French B)
3. P. E. (Intermediate Soccer, Flag Football)

- 3. P. E. (Recreational Games)
- 4. English (English Literature: Conflict)
- 5. History (Modern U. S.)
- 6. Lunch
- 7. Math (Advanced Algebra)
- 8. Study Hall

scheduled, and the pupil was on a regular program except for two English courses. During the winter quarter, the pupil was scheduled for nine periods a day, including driver education, study hall, and only one English course. Because of the flexibility in scheduling, the pupil will graduate one year earlier.)

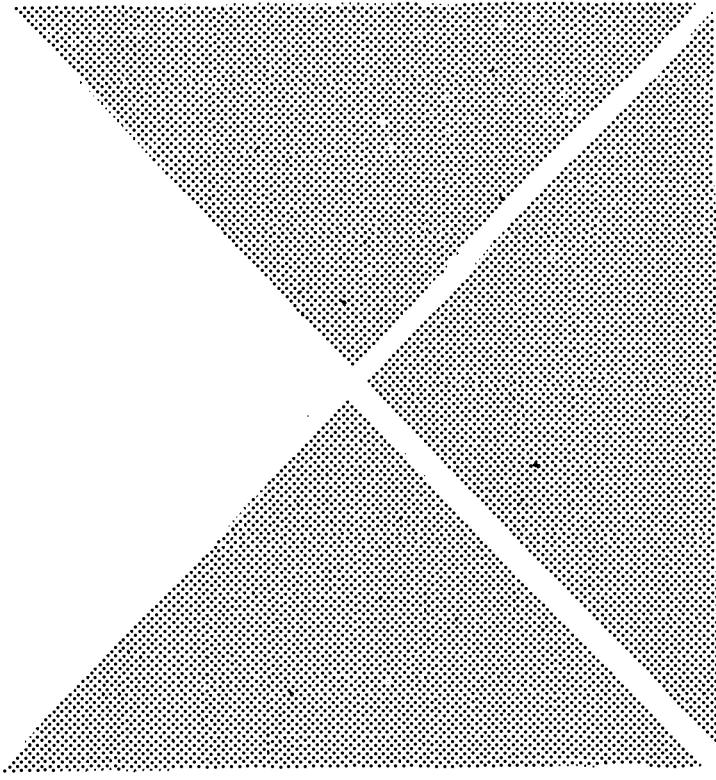

Advantages and Challenges

Some of the obvious advantages of the quarter program which pupils enjoyed were the ability to select courses designed specifically for their academic ability and accomplishments, to select courses more frequently than twice a year, to drop or add courses as needed, and to select from a much wider variety of the courses offered. The teachers expressed many advantages for the pupils but thought the professional staff was being confronted with certain problems which were requiring additional efforts to solve. Textbooks were not designed for the quarter plan. Identifying and acquiring adequate materials required extra work. Although in some cases teachers had only two basic preparations a day, they often found themselves having two different preparations the following quarter. Even with these problems, the consensus seemed to be that the program was sound and should be continued.

The First Fourth Quarter

The big question still remained—how many pupils would actually attend the fourth (summer) quarter? Related questions included—should only selected high schools be opened as in past summer sessions? If full day programs were offered, would pupils attend?

In the spring of 1969, the school board made a commitment to operate all high schools tuition free for a full regular day program for all pupils who wished to attend. Preregistration figures indicated that over 13,000 pupils would attend at least part of the day during the fourth quarter. Schedules were made and staff employed in accordance with preregistration requests. The actual number of pupils registered in the twenty-six high schools ranged from a low of 113 to a high of 1826. In all, 12,770 pupils—roughly thirty-nine percent of the enrollment during any one of the preceding three quarters—were enrolled in one or more courses. Each high school had a full staff including principals, counselors, librarians, nurses, and teachers to provide the requested academic program. Advanced courses were scheduled by 9,995, while 3,235 pupils took remedial work. (These two figures represent more than the total enrollment since in some cases pupils enrolled in both remedial and advanced work.)

During the first fourth quarter, the flexibility built into the design of the program became a reality for many pupils who were permitted to enroll in one or more courses without having to stay at school for the entire day. Each course, however, was selected in terms of the overall objectives of the pupil and with the assistance of the counselor and other appropriate personnel.

In addition to the flexibility for the regular courses described earlier, special courses were provided in settings other than classrooms. These special activities were designed to provide enriched learning opportunities in a non-conventional setting. Originally, these classes were offered during the summer quarter, but gradually they are being included in other quarters. A brief description of a selected number of these courses is shown on pages 60 and 61.

Trends

The enrollments during the fall and winter quarters of 1969 do not reflect any noticeable trends for pupils to exercise the option of taking vacations at times other than during the summer. There seems to be some increase in the number of pupils who wish to complete requirements for graduation earlier than would have been possible under the old system. There is not enough data at this time to determine the number who will graduate early or if in fact a trend is developing in that direction.

ANSWERS TO FREQUENTLY ASKED QUESTIONS

Visitors from practically every state and major city in the United States and from a number of foreign countries or protectorates have visited the Atlanta schools or have inquired by letter or telephone about the nature of the four-quarter program, the degree of its success, and similar questions. Answers to the most frequently asked questions are included in this section. No attempt has been made to be comprehensive or to rank these in any order of frequency or importance.

What do you mean when you speak of five quarter hours?
A pupil who attends class for one hour a day, five days a week for one quarter, earns five quarter hours of credit.

What did you do about the Carnegie unit in relation to accreditation? See the conversion table in the appendix.

Are pupils permitted to graduate earlier if they attend all four quarters? Yes, but pupils have always been allowed to complete requirements for graduation early if they attended summer school.

Is this a twelve-month program? No, twelve month has a connotation of continuous. This is a quarter system in which each quarter is autonomous with a scheduled break between each. Courses were developed with the minimum amount of sequencing which enables a pupil to attend or not attend during any quarter without undue scheduling problems or penalties.

How many days are in each quarter? At this time, we believe fifty-five days to be the most desirable, but because of various restrictions, we have not been able to accomplish this. Our school calendar appears in the appendix.

How many quarter courses may a pupil take each quarter? A pupil may earn from five to thirty quarter hours each quarter so long as he does not exceed 82½ hours during any three quarters. (Southern Association restricts a pupil to 5½ Carnegie units per year.)

What do you mean when you speak of five quarter hours?
A pupil who attends class for one hour a day, five days a week for one quarter, earns five quarter hours of credit.

Did you take the two semester course of study and divide it into three parts? Definitely not; the whole idea was to develop a completely new and more relevant curriculum for high school pupils. The process followed is explained more fully earlier in this report.

Does the quarter system cost more money? If you operate for four quarters each year, the answer is yes since four of anything costs more than three.

Are you assigning pupils to any particular quarter? No, pupils select the quarters they wish to attend. They may elect from part-time study to full-time study for four consecutive quarters each year.

Is there more flexibility in the new program than in the old? Definitely yes; not only is this true in terms of when a pupil might attend school but the courses he selects while in school!

How do you pay for the fourth quarter? The first three quarters of each year have been financed through the regular program (Minimum Foundation Program of the State supplemented with local funds) and the fourth quarter has been financed entirely from local funds.

Did you go into the fourth quarter to utilize better the space? Partially, if you include use of buildings in the summer as better space utilization. The primary reason, however, was to provide enriched and more relevant learning opportunities for pupils in the summer quarter as well as during the other three quarters.

Are teachers put on a four-quarter contract or do you have two contracts for teachers who teach the four quarters? To date, teachers receive a regular nine-month contract with a supplementary contract for the additional time worked.

May a pupil be off during any quarter other than the summer quarter? Yes, but during the first year, a rule was arbitrarily made that a pupil must attend all four of the first four quarters before he could take a vacation during a quarter other than the summer.

If a pupil is away from school the fall quarter, what do you do about a sister or brother who is in the elementary program? A pupil may attend school during any quarter he selects and is not restricted by the selection of his siblings. If different members within the same family elect different quarters to attend school, that is entirely a family problem.

Why did you start the four-quarter program in high school rather than in elementary school? This is a good question. It was felt that the high school program was in greater need of attention than the elementary. Although we would like to have implemented the quarter program in both the elementary and high schools at the same time, we felt the task was more than we could accomplish.

What are the advantages of a quarter system over a semester system? An attempt has been made to answer this question throughout the preceding pages of this report, but to put it simply—the pupil and his needs and learning style is the center of the program. Courses are designed and schedules are tailor-made for him. Of the eight hundred sixty courses developed thus far, no single course is required for any pupil unless it is part of his planned program and is necessary for him to obtain his goals.

Will teachers be able eventually to take off a quarter other than the summer quarter? Yes, as soon as contracts can be worked out on a quarter basis.

What do you estimate the cost of the first fourth quarter to have been? This is hard to say. High school principals, secretaries, custodians, and similar personnel were already employed on a twelve-month basis. Buildings remained opened and utilities connected all year. To provide teachers and counselors for the 12,777 high school pupils, and to provide teachers for a six-week program for 16,604 elementary pupils, required an additional expenditure of \$1,724,391.70. Expenditures by programs were not kept separately.

How many high school pupils were enrolled in your first fourth quarter? 12,777 or roughly thirty-nine percent of the number enrolled during any of the previous three quarters.

Are teachers to be paid at the same salary rate for the fourth quarter as they are for the other three quarters? Teachers will receive the same rate of pay for performing the same type service without regard to the season of the year. During the first fourth quarter, the salary was prorated down slightly.

Do you anticipate receiving money from the state for pupils who attend the fourth quarter? Yes, eventually, but at this time no one knows when that will be.

Are your curriculum guides for sale? If not, when will we be able to purchase some? No, but they will be as soon as they have been tested and revised to our satisfaction.

How do you use the course catalogue? The course catalogue contains the course number, course title, and description of all courses approved for the high schools in the Atlanta system. The catalogues are distributed to the high schools within the system and to neighboring school systems. From this catalogue, the initial selection of courses for each school is made. They are also used as a guide for interpreting transcripts and for scheduling in-coming pupils into appropriate courses.

Do you schedule your pupils now by computer or by hand? Most of the high schools schedule pupils with the aid of the computer. All high schools will utilize this service by the fall of 1970.

Do you think that the four-quarter program will give you an opportunity to have more flexibility in scheduling? Very definitely yes.

At present, all courses are five-quarter hours, do you anticipate having two-quarter hour courses, three-quarter hour courses, or even ten-quarter hour courses? There is nothing sacred about a five-quarter hour course. Being creatures of habit, we change slowly. There is no particular reason for not having courses which carry one, two, three, four or ten-hour credit.

Since textbooks are not prepared for the new titled courses that you offer, what problems do you have with textbooks and materials for classroom use? If you are having troubles with textbooks for classroom use, does this mean that you will gradually develop more and more of your own classroom materials? It is more difficult to find appropriate teaching materials for some subjects than for others. Hopefully, in every class there will be multiple materials which would be suitable for the various learning styles of the individual pupils. Textbooks as such will no longer be used as the only source of materials, but will become one of the many resources available. To restrict pupils to one text would put considerable restraints upon the potentialities of the four-quarter plan.

What did you do to sell the public on this program? This is discussed earlier in this report.

How do the pupils feel about the four-quarter program? In general, they like the program because of the freedom and flexibility provided and because of the relevance of the new selection of courses.

Do teachers like the quarter system better than the semester? Most teachers think the system is great for pupils. Some enjoy the new freedoms such as the ability to teach a non-conventional type course or a course designed specifically for a given group of pupils. However, adapting to

a new system, teaching without following textbooks in the conventional manner, and assuming an increased role in counseling pupils in scheduling have presented certain problems. The best evaluation to date seems to indicate that although the teachers are not as exuberant as pupils, they still are not willing to return to the old system.

A Parting Shot

What Is A Four-Quarter School Program? Structurally, the four-quarter program is simply dividing the school year into four periods of approximately equal length rather than into two semesters and a summer session. To be meaningful, a conscientious effort must be made to provide a complete program during each quarter and to require only minimum prerequisites and/or sequential offerings so that a pupil may choose to work or go on vacation at a time other than during the summer without undue penalty.

To divide merely the textbook or course into four quarters instead of two semesters is not sufficient. Without extensive revision of educational goals and an intensive analysis of the curriculum, four quarters of school will be no more of an exciting prospect than three quarters or two semesters. Factors other than time, number, and amount of days must be weighed. Each quarter course must be a complete and autonomous unit. The number of possible courses within a given discipline must be large enough to assure ease in scheduling while assuring continuous growth

opportunities for the pupil. Only occasionally would a pupil be required to pass a specific course since there are others which deal with similar concepts of equal quality which would serve as well.

With the four-quarter plan, a system can offer greater flexibility both in scheduling and in curriculum offerings. The possibilities appear unlimited and the benefits to pupils great. If a pupil chooses, he may take a greater number of courses in a twelve-month period. Such a choice permits him these options: He may graduate at an earlier date, enrich his plan of studies, take remedial work if required, or take an alternate course if he is unsuccessful in one. He may work in November on a job he possibly could not have gotten the previous June. He may even work part-time year-round on a part-time basis. To a great extent, he may vary his studies according to interest and convenience as course offerings become less sequential in some subject areas.

For the school system, advantages sought from a four-quarter plan are not financial. Initially, such an operation is more expensive to implement and maintain than the traditional two-semester plus a tuition-supported summer school. Benefits to pupils should be the prime reason for converting to a four-quarter school program.

APPENDICES

COURSE GUIDES IN MATHEMATICS AND ENGLISH

MATHEMATICS

ADMINISTRATIVE REQUIREMENTS

COURSE NAME Elem. Algebra (Course A)

One period per day, five days per week

COURSE NUMBER Mathematics 221

or

STUDENT CHARACTERISTICS

Any student who has made a score of 8.5 or above on a standardized achievement test given in the year prior to entering high school

CONTENT

or

who has satisfactorily completed three quarters of Fundamentals of Mathematics (Courses A, B, C) (Mathematics 111, 112, 113)

or

whose course selection is approved by his mathematics teacher of the previous quarter

COURSE DESCRIPTION

This course is primarily concerned with the foundation of Algebra.

- 4) The Negative Numbers a. Extending the Number Line
b. Operating with Directed Numbers

Elementary Algebra (Course A)
Mathematics 221

the equivalent of five hours per week

- 1) Symbols and Sets a. Numbers and Their Relationships
a. Numbers and Their Relationships b. Grouping Numbers
in Sets and Subsets c. Using Numbers in One or More
Operations
- 2) Variables & Open Sentences a. Analyzing Algebraic
Statements b. Problems Solved with Variables
- 3) Axioms, Equations, and Problem Solving a. Identifying
and Using Number Axioms b. Transforming
Equations With Equality Properties
- 4) The Negative Numbers a. Extending the Number Line
b. Operating with Directed Numbers

5) Equations, Inequalities, and Problem Solving a. Open Sentences in the Set of Directed Numbers b. The Analysis of Problems

4) To solve problems involving more than one operation

6) Polynomials

a. Addition and Subtraction

b. Multiplication and Division

*7) Special Products and Factoring

a. The Distributive Property in Factoring

b. Quadratic Trinomials

c. Extension of Factoring

*Where a computer terminal is available, problems may be programmed and computed. Where a terminal is not available, problems may be programmed.

*This section may be completed in Course B.

BEHAVIORAL OBJECTIVES

- 1) To communicate and perform operations in set terminology
- 2) To find the solution set in sentences of equality and inequality in one variable by applying the axioms
- 3) To prove algebraic statements from other given algebraic facts

5) Equations, Inequalities, and Problem Solving a. Open Sentences in the Set of Directed Numbers b. The Analysis of Problems

5) To solve and show the graph of equations and inequalities in one variable on the number line, to analyze and solve linear verbal problems in one variable

6) To add, subtract, multiply, and divide polynomials

7) To multiply and factor polynomials

SUGGESTED PROCEDURES

1) Review sets, their terminology and properties. (Limit time spent on item one of content, as this has been studied in previous courses.)

2) Develop clearly the meaning and the use of a variable in an open sentence, emphasizing related terms, such as: domain, replacement set, values, constant, etc. Be sure at this time that the student can solve a linear equation in one variable and related verbal problems.

3) Stress the axioms of equality, properties of the real number system, and their application in finding equivalent simplified equations.

4) Extend the number line to include all the negative real numbers. First develop, then stress the laws of signs for the four fundamental operations. Use distance on the number line to develop initially the concept of absolute value.

Emphasize that factoring is a necessary device in sequential work in algebra.

REFERENCES & AIDS

REFERENCES

- 5) Give repeated application to the axioms and properties of equalities and inequalities in equations and inequalities. Students may be given outlines, sketches and useful models to determine what is given and what is to be found when solving verbal problems.
- 6) In adding and subtracting polynomials, be sure that the students understand and can apply the axioms and properties used to combine similar terms. In multiplication and division students should obtain a workable knowledge of factors, exponents, prime numbers, and the use of the distributive property.
- 7) It is essential that the student can perform the following types of special products and factoring:
 - (1) $a(x + y) = ax + ay$ and $ax + ay = a(x + y)$
 - (2) $(a + b)(a - b) = a^2 - b^2$ and $a^2 - b^2 = (a + b)(a - b)$
 - (3) $(a + b)^2 = a^2 + 2ab + b^2$ and $a^2 + 2ab + b^2 = (a + b)^2$
 - (4) $(ax + b)(cx + d) = acx^2 + (ad + bc)x + bd$
 $acx^2 + adx + bcx + bd = (ax + b)(cx + d)$

ENGLISH DEPARTMENT

Course No. 427

Advanced Composition

Description of Course:

The study of model essays.

The writing of informal and formal essays.

The use of research procedures.

Administrative Requirements:

Because of paper work required of teacher, the class should be limited to 20 students.

One hour period, five days a week two days of which will be for laboratory activity.

Course recommended for students who:

have successfully completed one composition course, or are recommended by teachers.

Performance Objectives of Course:

The student . . .

given a well-organized essay of formal theme, outlines the major topics and supporting elements in acceptable outline form.

given several well-organized and well-developed compositions and a list of thesis statements, selects with 80 percent accuracy the thesis statement of each model.

writes a thesis statement and constructs a functional outline which is clearly the framework for a theme which he composes in a classroom situation.

given three thesis sentences on a topic with which he is familiar, writes within a specified period of time a paper in which he develops or supports one **and only one of the** three possible thesis. (Purpose: to demonstrate ability to stick to one controlling idea without being diverted by complementary ideas or to organize complementary ideas so that they support a controlling idea.) This is to be done to the satisfaction of the instructor.

from a given number of selections, recognizes and identifies with 80% accuracy the basic types of formal composition:

example comparison and/or contrast classification definition argument persuasion analysis

The student . . .

organizes and writes, upon request for a specific type, at least four of the above-listed types of formal compositions to the satisfaction of the instructor.

delineates to the satisfaction of instructor, by oral or written discussion or by presenting examples of each, the difference in formal and informal (familiar) essays.

writes an informal essay that entertains, informs, and holds the interest of his classmates.

demonstrates his understanding of specific word choices and of the impact of "energy" words over "static" words by identifying with 80 percent accuracy the "energy" words and/or phrases from a selected passage.

demonstrates his understanding of the effectiveness of concrete terminology and of descriptive detail by listing with 80 percent accuracy the layers of structure in a set of given sentences. Example: a sentence from "The Eighty-Yard Run" by Irwin Shaw: "I pivoted away, keeping the arm locked, dropping the safety man as he

ran easily toward the goal line, with the drumming of cleats diminishing behind him" contains three specific descriptions, two ("keeping arm locked," "dropping safety man") which refer directly to the sentence base ("He pivoted away") and one ("with the drumming . . . him") which describes the action in the modifying clause ("as he ran . . . line").

using selected sentences as models, constructs sentences which display several layers of structure; is able to describe with 80 percent accuracy these constructions.

on a topic of his own choosing or on a topic chosen from a given list of places, scenes, objects or actions, writes a paragraph or a short essay or a short narration which demonstrates to the satisfaction of instructor and classmates the ability to sustain a specific attitude toward the subject. Student should state the attitude in a sentence apart from the composition, not within it.

accomplishes his writing with 80 percent accuracy in the mechanics of commonly-used punctuation, spelling, sentence and paragraph and structure, and standard usage.

uses with 80% accuracy the skills developed on Composition 327: expanding and/or limiting the topic;

linking paragraphs logically; using a variety of methods of development: details, examples, comparison and/or contrast, definition, induction, deduction, spatial or chronological movement, etc.

answers with 80% accuracy the questions on a prepared test covering the procedures of research.

given a broad topic and an assignment to employ the resources available to him, prepares a working bibliography of at least twenty sources on a narrowed aspect of that topic.

given a set of bibliographical information and a list of situations in which this information might be needed in documenting a paper, prepares footnotes and bibliographical entries with 90% accuracy according to a given style manual (manual available to student at time of performance).

given several sets of quotations exemplifying various types of sources (from poetry, from plays, from novels, from speeches, etc.) and given several choices of methods or presenting this quoted material within a research paper, chooses with 70% accuracy the method advocated by style manual, text, and/or classroom demonstration.

[If desirable to specific school and/or teacher, research skills may be demonstrated through the step-by-step evaluation of the students' writing of a short research paper. These skills should NOT, however, be demonstrated only through the teacher's evaluation of the final composition.]

FLOW CHARTS IN SCIENCE AND MATHEMATICS

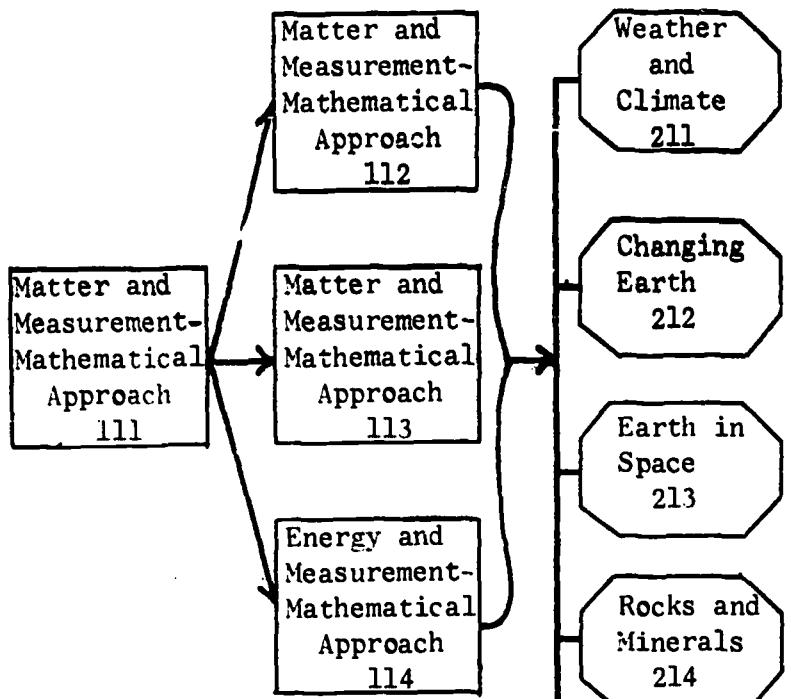

PHASE I (Introductory)

PHASE II (Intermediate)

NOTE: A pupil may move from the Academic Program to the Basic Program at any quarter.

PROCEDURES FOR REVISING COURSE OFFERINGS

PROCEDURES FOR REVISING COURSE OFFERINGS

Procedures for Revising Course Offerings

Curriculum development and revision is a never-ending process. Courses composing the curriculum should be continuously evaluated and reviewed, and changes should be based upon an analysis of the pupils to be served and the objectives to be accomplished in the course. A determination should be made concerning the appropriate content for enabling those pupils with identified needs, interests, and abilities to attain realistic educational objectives. All persons concerned should be represented in the revision process, including the professional staff, parents, and pupils who can contribute to making decisions concerning various aspects of the curriculum.

The following procedures will be followed in this process.

- Any group or individual who recognizes a need for a revision or addition of a course should make his request in writing to the assistant superintendent for instruction.

- The assistant superintendent will initiate and coordinate the curriculum planning activities which will involve both appropriate groups and individuals.
- An outline of the requested revision or addition will be developed by the planning groups and will

- include: characteristics of pupils for whom the course is designed, accomplishments to be realized during the course (behavioral objectives), suggested content for achieving these objectives, administrative conditions and/or resources needed to provide the quality learning experience.
- The written outline of the proposed course will be submitted for suggestions and recommendations to school principals who might include such an offering in their program.
- The assistant superintendent for instruction will then submit to the superintendent and his administrative staff the course outline for appropriate recommendation.
- Final approval for a course offering will be made by the superintendent.
- After approval by the superintendent, the details of the course will be submitted to the Atlanta Board of Education for information and/or appropriate action.
- The same steps as outlined should be taken in deleting courses from the curriculum, except that no outline of the course will be necessary. In place of the outline, justification for deleting the offering should be given in terms of one or more of the curriculum components listed in procedure number three above.

COMPLETE LIST OF ENGLISH COURSES

ENGLISH

| COURSE NO. | TITLE | DESCRIPTION |
|------------|----------------------|---|
| 301010 | READ. IMPROVEMENT A | A SERIES OF COURSES DESIGNED TO IMPROVE THE LISTENING, SPEAKING, READING AND WRITING SKILLS OF THE SEVERELY DISABLED READER. |
| 301020 | READ. IMPROVEMENT B | |
| 301030 | READ. IMPROVEMENT C | |
| 301040 | READ. IMPROVEMENT D | |
| 301110 | COM. SKILLS LABS I | LANGUAGE SKILLS COURSES DESIGNED TO TEACH THE COMMUNICATION SKILLS OF LISTENING, SPEAKING, READING AND WRITING IN AN INTERRELATED APPROACH. |
| 301120 | COM. SKILLS LABS II | |
| 301130 | COM. SKILLS LABS III | |
| 301140 | COM. SKILLS LABS IV | LANGUAGE SKILLS COURSES DESIGNED TO TEACH THE COMMUNICATION SKILLS OF LISTENING, SPEAKING, READING AND WRITING IN AN INTERRELATED APPROACH. |
| 301150 | COM. SKILLS LABS V | SAME |
| 301160 | COM. SKILLS LABS VI | SAME |

301180 SPELLING

DESIGNED TO IMPROVE BASIC SPELLING SKILLS. SOME PROFICIENCY IN THE FOLLOWING AREAS IS A DESIRED OUTCOME OF THE COURSE: USE OF DIACRITICAL MARKS, SYLLABICATION, ROOTS, PREFIXES AND SUFFIXES.

301210 LITERARY THEMES

A COURSE TO INTRODUCE THE STUDY OF LITERATURE IN HIGH SCHOOL, WITH EMPHASIS ON IDENTIFYING AND UNDERSTANDING LITERARY THEMES.

301220 MYTHS AND LEGENDS

A STUDY OF GREEK, ROMAN AND NORSE MYTHOLOGY, NEGRO FOLKLORE, WORLD MYTHS, ARTHURIAN LEGENDS, LEXICOGRAPHY AND WRITING.

301230 SENTENCE PATTERNS

AN OVERVIEW OF THE NATURE OF LANGUAGE AND A STUDY OF THE STRUCTURE OF THE SENTENCE AND ITS PATTERNS.

302010 READING INTERPRETATION

A COURSE TO DEVELOP AND ENHANCE THOSE SKILLS NEEDED FOR EFFICIENT, FUNCTIONAL READING.

302020 LITERARY MODES

AN INTRODUCTION TO LITERATURE THROUGH THE STUDY OF THE ROMANTIC, COMIC, AND TRAGIC MODES, WITH REPRESENTATIVE SELECTIONS IN THESE AREAS.

302030 LANGUAGE SKILLS

THE STUDY OF ORAL AND WRITTEN ENGLISH LANGUAGE, WITH PARTICULAR EMPHASIS ON THE SENTENCE, APPROPRIATE USAGE, AND WORD STUDY.

302040 TRANS. GRAMMAR

**INDUCTIVE APPROACH TO THE TEACHING
OF THE STRUCTURE OF ENGLISH.**

302110 MASS MEDIA

**A COURSE TO DEVELOP CRITICAL EVALUATION
OF MASS MEDIA AND THE INFORMATION AND
ENTERTAINMENT OFFERED TO THE PUBLIC.**

302120 THE PARAGRAPH

**A STUDY OF THE PARAGRAPH AS AN ORAL AND/OR
WRITTEN REPRESENTATION OF A UNIT OF
DISCIPLINED THOUGHT.**

302130 LITERARY TYPES

**A STUDY OF THE FIVE LITERARY GENRE AND
THEIR DISTINGUISHING CHARACTERISTICS, WITH
ATTENTION TO ENGLISH USAGE AND WRITING.**

302250 VOC. DEVELOPMENT

**DESIGNED TO MEET THE NEEDS OF
STUDENTS WHO ARE COLLEGE BOUND**

**AND THOSE WHO HAVE SPELLING
DIFFICULTIES.**

303010 EXPOS. COMPOSITION

**A STEP-BY-STEP APPROACH TO SUCCESSFUL
EXPOSITORY COMPOSITIONS.**

303020 ADVENTURING LIT. I

**A COURSE EXPLORING THE THEMES OF BATTLE,
THE SUPERNATURAL, AND PHILOSOPHY IN
LITERATURE OF THE WORLD.**

303030 ADVENTURING LIT. II

**A COURSE DEVELOPING THE THEMES OF EXPLORA-
TION, LEGEND, AND MYSTERY AS PRESENTED IN
WORLD LITERATURE.**

303050 AMERICAN LIT. I

A COURSE DEVELOPING THE THEMES OF THE PURITAN TRADITION, THE FRONTIER SPIRIT, AND THE IDEAL OF SUCCESS IN AMERICAN CULTURE AS THEY ARE PRESENTED IN AMERICAN LITERATURE.

303060 AMERICAN LIT. II

A COURSE DEVELOPING THE IDEAS OF DISILLUSIONMENT AND BELIEF IN AMERICA AS MAJOR THEMES PRESENTED IN AMERICAN LITERATURE.

303110 ENG. LIT.: VALUES

AN EXPLORATION OF THE ATTITUDES AND ASSUMPTIONS OF ENGLISH WRITERS IN RELATION TO THE INDIVIDUAL, SOCIETY, AND THE UNIVERSE.

303120 ENG. LIT.: CONFLICT

A STUDY OF THE EFFECT OF CONFLICT ON INDIVIDUALS AND GROUPS AS REVEALED IN MAJOR WORKS OF ENGLISH LITERATURE.

303210 ORAL LANGUAGE

THE STUDY OF EFFECTIVE COMMUNICATION THROUGH ORAL EXPRESSION.

303220 CREATIVE WRITING

A STUDY OF AND USE OF THE CRAFT OF WRITING POEMS, SHORT STORIES, DRAMAS, AND PERSONAL ESSAYS.

303230 READINGS MODERN MAN

A COURSE EXAMINING A VARIETY OF SHORT READINGS PRESENTING IDEAS AND VALUES IMPORTANT TO OUR TIMES.

303240 DRAMA FOR MODERN MAN

A COURSE INTRODUCING DRAMA AS A MEANS OF EXPRESSING IDEAS ABOUT MAN AND OF EXPERIENCING INDIRECTLY THE CONCERNS OF OTHERS.

- 303250 THE SHORT STORY A STUDY OF THE SHORT STORY AS A REPRESENTATION OF LIFE, WITH EMPHASIS ON ENJOYMENT AND UNDERSTANDING OF THE GENRE.
- 303260 THEATRE STAGE CRAFT THE TECHNICAL ASPECTS OF THEATER AND THE FUNDAMENTALS OF PLAY PRODUCTION.
- 303270 COMPOSITION THE STUDY OF BASIC COMPOSITION TYPES.
- 303310 HUMANITIES I AN OVERVIEW OF THE HUMANISTIC APPROACH TO LEARNING, WITH EMPHASIS UPON CONSTRUCTING RELATIONSHIPS AMONG SEVERAL ARTS.
- 303320 HUMANITIES II AN INVESTIGATION OF THE WAY PREVIOUS GENERATIONS HAVE FOUND SOLUTIONS TO THE PROBLEMS OF THE ERA.
- 303330 HUMANITIES III OPPORTUNITIES FOR INDIVIDUAL PERSONAL RESPONSES TO THE PROBLEMS OF HUMAN EXPERIENCE.
- 303410 INTRO. JOURNALISM SURVEY STUDY OF THE DEVELOPMENT CHARACTERISTICS, AND TECHNIQUES OF VARIOUS TYPES OF JOURNALISTIC PRESENTATIONS, GIVING LIMITED EXPERIENCE IN PRODUCTION.
- 303420 INTER. JOURNALISM DETAILED EXPLORATION OF THE PRODUCTION OF SCHOOL NEWSPAPER, YEARBOOK, MAGAZINE, RADIO PROGRAM, INCLUDING ON-THE-JOB TRAINING WITH ONE OF THEM.

- 303430 ADV. JOURNALISM ACTUAL PRODUCTION OF A SCHOOL PUBLICATION, INCLUDING ASSISTANCE WITH TRAINING OF INCOMING STAFF MEMBERS.
- 303510 THE NOVEL AN EXPLORATION OF THE NOVEL AS A REPRESENTATION OF LIFE TO HELP THE STUDENT DEVELOP INSIGHTS ABOUT HIMSELF AND HIS WORLD.
- 303600 CREATIVE DRAMATICS STUDENTS APPLY SKILLS THEY HAVE ACQUIRED IN THE AREA OF STAGE AND THEATRE BY PRESENTING PLAYS.
- 303610 DRAMA A COURSE ENABLING STUDENTS TO ENJOY DRAMA AND TO UNDERSTAND ITS DEVELOPMENT, TYPES, STYLES, STRUCTURE, AND CRITICISM.
- 303620 SHAKESPEARE A COURSE CONCERNED WITH THE STUDY OF SHAKESPEARE'S PLAYS AS LITERARY MASTERPIECES AND AS ART FORMS TO BE ENJOYED AND REACTED TO.
- 304010 LANGUAGE DEVELOPMENT STUDY OF DEVELOPMENT AND USE OF THE ENGLISH LANGUAGE: HISTORY, DIALECTS, SEMANTICS, LEXICOGRAPHY, USAGE, AND GRAMMAR.
- 304020 AMER. ENG. DIALECTS A COURSE RECOGNIZING SOCIAL AND REGIONAL DIALECT DIFFERENCES EXISTING AMONG SPEECH COMMUNITIES.
- 304C30 REVIEW OF GRAMMAR A REVIEW OF THE TERMINOLOGY AND FUNCTIONS OF GRAMMAR.

304050 POETRY

A STUDY OF POETRY THROUGH CLOSE READING
AND DISCUSSION OF IMAGERY, STRUCTURE,
AND THEME, FREQUENTLY CONCENTRATING ON
MANY POEMS BY ONE AUTHOR.

304060 TRENDS CONTEMP. LIT.
AN EXPLORATION OF THE IDEAS, SUCH AS
EXISTENTIALISM AND THEATRE OF THE ABSURD,
WITH WHICH MODERN WRITERS CONCERN THEM-
SELVES.

304070 LIT. OF WEST. WORLD
A SAMPLING OF ANCIENT AND MODERN
WRITINGS OF ALL GENRES FROM ALL
CULTURES OF THE WESTERN WORLD.

304080 LIT. OF EAST. WORLD
A SAMPLING OF ANCIENT AND MODERN
WRITINGS OF ALL GENRES FROM ALL
CULTURES OF THE EASTERN WORLD.

304270 ADV. COMPOSITION
THE STUDY OF MODEL ESSAYS, THE WRITING
OF INFORMAL AND FORMAL ESSAYS, THE USE
OF RESEARCH PROCEDURES.

304310 HUMANITIES IV
A STUDY OF AMERICAN CULTURE AS A FUSION
OF MAN'S EXPRESSIONS IN HISTORY, LITERA-
TURE, MUSIC AND ART.

304320 HUMANITIES V
AN INVESTIGATION OF THE AMERICAN CULTURAL
HERITAGE FROM THE COLONIAL THROUGH THE
FRONTIER ERAS.

304330 HUMANITIES VI
AN INVESTIGATION OF THE CULTURAL HERITAGE
OF AMERICAN FROM THE INDUSTRIAL ERA THROUGH
THE 20TH CENTURY.

**CONVERSION TABLE FOR CHANGING CARNEGIE UNITS
INTO QUARTER HOURS**

Conversion Table
Academic And Activity Credits To Quarter Hours

One (1) Carnegie unit equals fifteen (15) quarter hours. To convert eighth grade work to quarter hours:

- (1) Count academic and activity credit for the work you satisfactorily completed last year.
- (2) Use the following conversion table to find the number of quarter hours your academic and activity credits equal.

| ACADEMIC | | ACTIVITY | |
|--------------------|----------------------|------------------------|----------------------|
| Unit Credit | Quarter Hours | Activity Credit | Quarter Hours |
| 1/2 | 7-1/2 | 1/8 | 4 |
| 1 | 15 | 1/4 | 7-1/2 |
| 1-1/2 | 22-1/2 | 3/8 | 11 |
| 2 | 30 | 1/2 | 15 |
| 2-1/2 | 37-1/2 | 5/8 | 19 |
| 3 | 45 | 3/4 | 22-1/2 |
| 3-1/2 | 52-1/2 | 7/8 | 26 |
| 4 | 60 | 1 | 30 |
| 4-1/2 | 67-1/2 | 1-1/8 | 34 |
| 5 | 75 | 1-1/4 | 37-1/2 |
| 5-1/2 | 82-1/2 | 1-3/8 | 41 |
| 6 | 90 | 1-1/2 | 45 |
| 6-1/2 | 97-1-2 | 1-5/8 | 49 |
| 7 | 105 | 1-3/4 | 52-1/2 |
| 7-1/2 | 112-1/2 | 1-7/8 | 56 |
| 8 | 120 | 2 | 60 |
| 8-1/2 | 127-1/2 | 2-1/8 | 64 |
| 9 | 135 | 2-1/4 | 67-1/2 |
| 9-1/2 | 142-1/2 | 2-3/8 | 71 |
| 10 | 150 | 2-1/2 | 75 |
| 10-1/2 | 157-1/2 | 2-5/8 | 79 |
| 11 | 165 | 2-3/4 | 82-1/2 |

| 15-1/2 | 232-1/2 | | |
| 16 | 240 | | |

Promotion To:

- 9th Grade . . . 60 qr. hrs.
- 10th Grade . . . 135 qr. hrs.
- 11th Grade . . . 210 qr. hrs.
- 12th Grade . . . 285 qr. hrs.
- Graduate . . . 375 qr. hrs.

REQUIREMENTS FOR HIGH SCHOOL GRADUATION

REVISED REQUIREMENTS FOR HIGH SCHOOL GRADUATION AS PRESENTED TO THE ATLANTA BOARD OF EDUCATION

It is recommended that requirements for high school graduation be modified to provide more flexibility and greater choice of subjects and subject fields for high school pupils. The proposed requirements will meet the requirements of the State Department of Education and accreditation agencies. They facilitate implementation of a four-quarter school year and more adequately achieve the goal of providing a curriculum more relevant to all pupils.

It is proposed that accounting for credit be in terms of quarter hours rather than Carnegie units. A quarter hour is defined as a minimum of fifty (50) minutes and a maximum of sixty (60) minutes of instruction per week or its equivalent. A total of 375 quarter hours (grades 8 through 12) will be required for graduation.

Proposed Graduation Requirements in Subject Fields

Grades 8 - 12

| Subject Field | Quarter Hours |
|--|----------------------|
| English | 60 |
| Social Science | 60 |
| (Georgia History and 15 quarter hours in American History) | |
| Mathematics and Science | 75 |
| (A minimum of 30 quarter hours in each field and 15 in biology) | |
| Home Economics and/or Industrial Technology | 10 |
| Art and/or Music | 10 |
| *Physical Education and/or Military | 55 |
| Health | 5 |
| | <hr/> |
| | 275 |

*The requirement of fifty-five quarter hours in physical education and/or military will be held in abeyance for a trial period of one year subject to extension.

**Revised Requirements for High School Graduation
As Presented to the Atlanta Board of Education**

It is also proposed that to be consistent with state requirements a minimum of 300 quarter hours be earned in fields other than physical education, military, health, athletics, and school service.

It is possible for a pupil to earn as many as 450 quarter hours during his five years of high school. Only 275 quarter hours are to be taken in specified fields. A minimum of 375 quarter hours are required for graduation.

CALENDAR FOR SCHOOL YEARS 1968-69 AND 1969-70

SCHOOL CALENDARS FOR
1968-1969 AND 1969-1970

1968-69

Quarter Begins Quarter Ends

| | |
|-------------------|---------------|
| 1st Sept. 3, 1968 | Nov. 26, 1968 |
| 2nd Dec. 2, 1968 | March 5, 1969 |
| 3rd March 6, 1969 | May 30, 1969 |
| 4th June 4, 1969 | June 15, 1969 |

Teacher planning days when students are not present: August 16 through 30, 1968; Nov. 27, 1968; March 7, 1969; June 5, 6, 1969.

1969-70

Quarter Begins Quarter Ends

| | |
|-------------------|-----------------|
| 1st Sept. 2, 1969 | Nov. 24, 1969 |
| 2nd Nov. 25, 1969 | March 4, 1970 |
| 3rd March 5, 1970 | June 1, 1970 |
| 4th June 8, 1970 | August 19, 1970 |

Teacher work days when students are not present: August 25 through 29, 1969; November 26, 1969; March 6, 13, 1970; April 3, 1970; June 3 through 10, 1970.

SPECIAL LEARNING OPPORTUNITIES

Humanities Seminar combines the disciplines of art, music, literature, and social science. This course provides a broad understanding of our cultural heritage and is designed to help the pupil answer four basic questions: (1) Who am I and what is my value system? (2) What is the nature of the society in which I live? (3) How did the society get this way? (4) What is my responsibility to it? Any high school pupil enrolled in the city school system is eligible to enroll in this course. Classes are held daily for one quarter and have at least three different teachers working cooperatively to provide appropriate learning opportunities for the pupils involved. Included also is a two-week tour of outstanding historical and cultural centers located along the eastern coast of the United States. Included in the tour are Richmond, Jamestown, and old Williamsburg, Virginia; Washington, D. C.; New York City; Tanglewood, Massachusetts. Activities included a tour of Monticello, the Capitol, art galleries, the United Nations building, Broadway productions, and walking tours. The teachers accompany the pupils while on tour and classes are held while en route. Pupils earn fifteen quarter hours credit—five hours in English, five hours in social science, and five hours in fine arts. (Thirty-four pupils completed this course during the summer quarter, 1969.)

previously learned science courses, to develop a better understanding of their interrelatedness, and to apply what is required in chemistry, geology, biology, physics, and hydrography. Certain basic understandings and skills which might be directed to the marine environment, in addition to class periods held in a high school and led by a certified teacher, other experiences are provided by scientists at the Georgia Institute of Technology and some time spent studying in the hydraulic laboratory in the School of Civil Engineering. Field trips to Mount Arabia will be taken to compensate the biological and geological studies.

One week is spent studying at Sapelo Island Marine Institute under the direction of professors from the University of Georgia. Pupils will be exposed to the assorted environments of a salt water marsh, undisturbed beaches, fresh water ponds, shoreline geology and marine biology.

Fifteen quarter hours credit in the area of science will be earned. (Twenty pupils completed the course during the summer quarter, 1969.)

Drama Workshop is a cooperative venture between the Atlanta Public Schools and the Academy Theater but has assistance of other supportive agencies. This course is open to any high school pupil and offers an opportunity to study under the direction of a certified teacher, a playwright and

Oceanography is open to all high school seniors with aptitude and interest in the sciences but must be recommended by the respective teachers. The overall objectives are to refresh skills and competences from

producer, and professional actors. Activities include planning and writing a play, directing and producing it, designing and making costumes and scenery, and presenting performances in parks, schools, churches, college campuses, theaters, and the Memorial Arts Center.

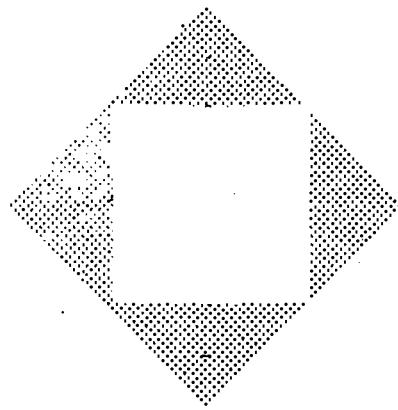

Fifteen quarter hours of elective credit is earned. (Forty-five pupils completed the course during the summer quarter, 1969.)

Operation Upstream is designed to help boys develop understanding in four areas: (1) one's self; (2) small groups and the relationships with them; (3) society and one's role in it; and (4) one's relationship to nature (the great Spirit, Dietry, Sustainer of Life).

This twenty-six day course is taught in the wilderness area of the North Georgia mountains. It provides opportunities for a young man to develop his physical and mental strengths, to face loneliness during a three-day solo, and to develop a better self-image and understanding of his relationship to his peers, his society, and his future. Activities include mountain climbing, downproofing, obstacle course, hiking, swimming, boating, survival, and instruction in environmental biology, sociology, and physical education.

completed the course during the summer quarter of 1969.)

Seventh Grade Tours are enrichment programs designed for pupils who have completed the seventh grade. The program lasts for two weeks and no credit is earned. The structure of the activity is divided into two main parts. One is a general overview of our English heritage and what to expect during the second phase. The second phase is one of three different five-day tours to various points of interest in the Carolinas, Virginia, and Washington, D. C. All three tour routes include the National Capitol. Teachers and appropriate chaperones are a part of each tour staff. (Two hundred pupils participated during the summer quarter of 1969.)

Fifteen quarter hours of elective credit is earned for successful completion of the course. (Ninety-three boys
